

Hi Celina ❤️!

Demo of a simple AsReporter template, two types of objects here:

1. **This is important data from JSON** - this element will be replaced by corresponding element value from JSON
2. Tables - the table is represented in JSON as two-dimensional array containing the cell contents

ID	Column 2		Info
r1c1	r1c2	r1c3	r1c4
r2c1	r2c2	r2c3	r2c4

COL1	COL2
